The Politics of Indonesia

"Completely revised and updated, this new edition of The Politics of Indonesia is an engaging and accessible account of the main political issues and challenges confronting Indonesia as it moves forward into the twenty-first century. Since the forced resignation of Suharto as president in 1998, Indonesia has seemingly lurched from one crisis to the next: the country's first democratically elected president, Abdurrahman Wahid was ejected from government; the army has become politically active again; and militant Islamic politics and a chauvinistic nationalism have emerged as significant forces on the political landscape. Now, with the ascension of Megawati Sukarnoputri to the presidency, Damien Kingsbury looks in detail at her style of government and the fundamental issues and concerns facing Indonesia.

The biggest question facing this heterogeneous nation seems to be whether the Republic of Indonesia will be able to hold together or whether this unitary state was just a brief moment in post-colonial history. "This book is a valuable resource for students of Asian studies, politics, and related disciplines. Likewise, it remains essential reading for those wishing to travel or do business in Indonesia and for anyone living in the strategic shadow of this important, diverse, and fragile country."

Detailed information on the political system of Indonesia is available from 123independenceday.com. The Constitutional System of Indonesia and its branches are covered here. The political system of Indonesia is a framework of a presidential representative democratic republic. Indonesia is a unitary state with power concentrated in the national government. In the Indonesian government, the powers are vested in the executive, which is exercised by the government, legislative power is vested in both the government and the two People’s Representative Councils and the judiciary is independent of the executive and the legislature. The Constitutional System. The politics of Indonesia takes place in a framework of a presidential representative democratic republic, whereby the President of Indonesia is both head of state and head of government, and of a multi-party system. Executive power is exercised by the government. Legislative power is vested in both the government and the two People’s Representative Councils. The Politics of Indonesia takes place in a framework of a presidential representative democratic republic, whereby the President of Indonesia is both head of state and head of government, and of a multi-party system. Executive power is exercised by the government. Legislative power is vested in both the government and the two People’s Representative Councils. The 1945 constitution provided for a limited separation of executive, legislative, and judicial power. The governmental system has been described as "presidential"
